MARCH 2022 | VOL.02

The iDream project (INTERACTIVE - DIGITAL READINESS for ALL EDUCATION MENTORS) continues to evolve. Recently, a special partner meeting took place.

On February 25th - March 1st, 2022, the "Train the Trainers" training was conducted in Reus, Spain.

DomSpain was the host organization.

The aim was to train 12 trainers / educators who understand the need to deepen digital readiness and are aware of the ongoing digital transformation - changing from traditional classroom methods to an online / blended approach. This has contributed to professional development, will strengthen their aspirations and encourage them to fully use your potential.

The training consisted of 6 modules described below. We encourage you to read more carefully about the objectives of each part. The full course content will be available soon.

MODULE 1: COMMUNICATION AND COLLABORATION. SHARING THROUGH DIGITAL TECHNOLOGIES – DATA, VOICE AND VIDEO

The aim of implementing the module is:

- To develop communication and collaboration skills.
- To expand knowledge about sharing through digital technologies - data, voice and video - what technologies are available for online learning.
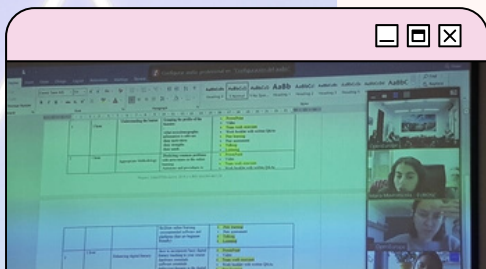

MODULE 2: COMPUTER DIGITAL LITERACY – USEFUL FOR TUTORS TO TEACH TO LEARNERS NEW TO ONLINE LEARNING

We implement this module to develop an understanding of how to approach learners who are new to online learning. More specifically this module will guide the trainer on how to best understand their learners in order to ensure a learner-centered approach, decide on the appropriate methodology, suitable for newcomers to the online learning, incorporate basic digital literacy to their work regardless of their primary topic and finally offer the chance to put in practice and built the relevant skills.

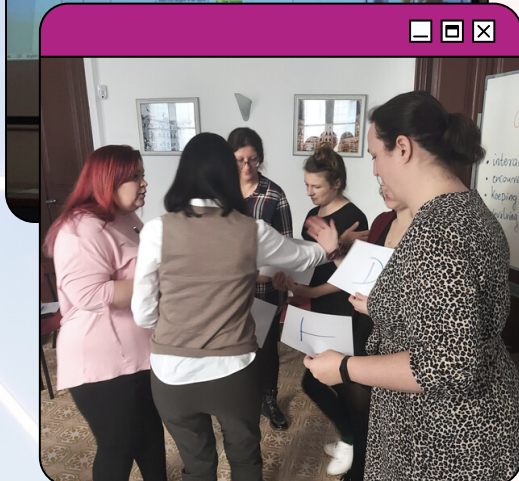

MODULE 3: NETIQUETTE - INTERACTIVE TELECOMMUNICATIONS

The aim of this training is to help develop your skills to be able to be aware of your social identity and the role it has on your everyday life.

MODULE 4: THE VALUE OF SYCHRONOUS LEARNING – HOW TO KEEP STUDENT CENTRED LEARNING ONLINE

The aim of implementing the module is:

- To develop an understanding of what synchronous and student-centred learning consist of in online environments.
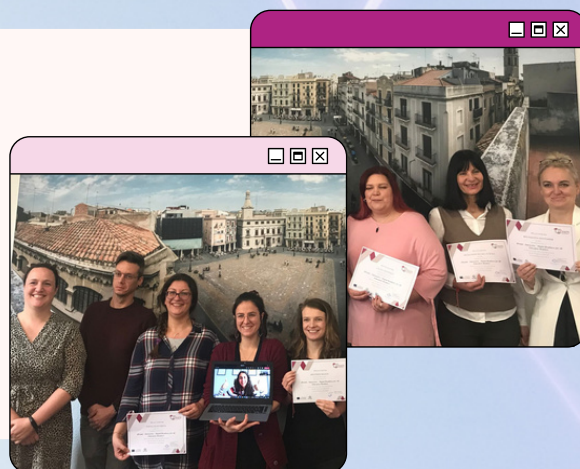

MODULE 5: WHAT ARE THE INGREDIENTS OF A GOOD ONLINE WEBINAR LESSON, THE TEACHING CONTENT, PURPOSE, APPLICATION OF KNOWLEDGE AND ASSESSMENT?

The aim of this training is to help develop your skills to be able to perform a successful online webinar lesson.

MODULE 6: DIGITAL CONTENT CREATION – LESSON PLANS TAILORED FOR ONLINE LEARNING AND HOW THEY DIFFER FROM FACE TO FACE

We implement this module to develop an understanding how digital content create.
